Campbell Interurban Press

VOLUME 22, No. 12 — CAMPBELL, SANTA CLARA COUNTY, CALIFORNIA — FRIDAY, SEPTEMBER 22, 1916

A FEW SPECIALS

Kaureli—A Hot Tomato Sauce	5c
Kwikserve—Another hot Tomato sauce	5c
Concentrated Tomato,—a few cans only	5c
Gebhardts—Genuine Mexican Frejolas	10c
Gebhardts—Spaghetti and Chili with Cheese	10c
Gebhardts—Rice with Chili	10c
Gebhardts—Chili Con Carne	10c
Tea Garden—Peanut Butter	10c
Lippincotts—Apple Butter	10c
Dixie Style—Sweet Pickles	10c
Del Monte—Pumpkin for pies	10c
Hillsdale—Pineapple	10c
California Home—Dill Pickles	15c
Burnham and Morrills—Fish Flake	10 and 15c
Cornado—Abalone	15c
Everyready—Raviola	15c

All good quality, and put up in sanitary cans.

Local and Personal

School Shoes. Every pair solid leather throughout, for Boys, for Girls.
E. E. SOWER.

A few good Leghorn cockerels at $1.00 each. Also broilers and fryers.
ALEXANDER, Dillon Avenue.

Mrs. W. W. Powell and children arrived home from Durham Friday after spending the summer there with Mr. Powell.

The proprietors of the two garages in Campbell have heard the call to brighten up and as the result their buildings are receiving new coats of paint.

Mr. and Mrs. F. L. Buck of Pacific Grove, Miss Blanche Bloomfield of Long Beach, and Mrs. Titcomb of San Jose were guests of Miss Mary Lewis Tuesday.

Mrs. Williams of Naglee Park, San Jose, was out for a day's visit with her former neighbors, Mrs. Ralph Hyde and Mrs. Broder.

Madame Schumann-Heink has been secured as one of the performers for the Peninsula Musical Association of Palo Alto at its first concert in early November.—*Times.*

Mr. and Mrs. Fred Bohrman went to Pacific Grove last week to spend a month with Mrs. Bohrman's parents, Mr. and Mrs. A. S. Collins.

Mr. and Mrs. W. C. McCaughey returned from the San Joaquin valley Saturday to spend the fall and winter with their daughter, Mrs. T. A. Robinson.

Judge Farley has opened his registration office at the library building and those who wish to change their party affiliation or have moved must re-register before October 7th.

The C. E. held a social farewell party at the R. E. Dunphy home on Los Gatos road Friday evening in honor of Raymond Cowles, its president, who left this week for the south.

The L. Genasci family went to Santa Cruz Sunday to celebrate with their fellow-countrymen the Swiss Independence. There were present Swiss from all parts of the state.

W. B. Lowry says: "An idle hour, a good book, hammock in the shade, and a box of Geo. Haas & Sons 'Home Made Specials' comes as near Heaven as most of us are likely to get here on earth.

Republicans Meet

Santa Clara County Republican central committee held a regular meeting at the court house Saturday. The following resolutions were unanimously adopted:

Be It Resolved, That the Republican county central committee call upon all Republicans of Santa Clara county to come to the support of the Republican ticket and do everything in their power to bring about the election of the entire Republican ticket as follows: President, Charles E. Hughes; vice-president, Charles W. Fairbanks; United States senator, Hiram W. Johnson; congressman, E. A. Hayes; state senator, F. H. Benson; assemblymen, T. V. Brown and Daniel Hayes.

Be It Resolved, That the Republican county central committee of Santa Clara county desires the support of all citizens for the entire Republican ticket, and to that end welcomes the co-operation of the Republican organization and all similar bodies in the present campaign.

L. D. BOHNETT,
W. L. BIEBRACH,
E. N. RICHMOND,
Committee.

California Weekly Industrial Review

Associated lima bean growers will sell a million bags at $5.30 per 100 pounds.

Humboldt county taxpayers defeated $1,500,000 road bond issue.

Santa Cruz—Piedmont court will have $12,000 Pacific Coast furniture.

Press protesting against using S. F. auditorium for prize fighting.

Fresno union high school gets $55,000 annex.

Population of California estimated at three million. July 31 there were 131 less prisoners in penitentiares, insane hospitals increased 334 during year, reform schools 30, and feeble minded 87.

Redding—Plans for $75,000 school building have been called for here.

Eureka—Building permits last month totaled $17,945.

Lakeport—Work starts on $25,000 high school here.

Redding—Brick plant reopens here to make 1,500,000.

San Francisco, Portland and Seattle to have big freighter line to Norway.

Imperial Valley cotton crop estimated to be worth $6,000,000 this year.

Manteca—Sugar beet crop in this section estimated to be worth $300,000.

Six Propositions to be on November Ballot

Six propositions only will go upon the ballot at the November election, according to announcement of Secretary of State, Jordan. There are two prohibition bills, two highway bond measures, a single tax bill, and a bill making legislators ineligible to other offices.

There is apparent enthusiasm for the proposition to prevent members of the legislature from holding other offices.

The representatives of the people are the supreme law making power, second only to the people themselves but more active.

The temptation of legislature men to get jobs out of their activities in the general assembly is great and many fall.

They either accept positions on boards and commissions and in departments, or they get up new schemes to give this opportunity.

Both practices destroy the independence of the legislative department of the government, and both practices heap up higher taxes.

Voters of all partices will be safe in adding this safeguard to the constitution, which is already the law of most western states.

Mrs. S. L. Hayes, who had been visiting in the bay cities, returned Friday.

I. W. Snow is driving an Overland touring car which he recently purchased.

There will be no meeting of the Improvement Club during September, the regular time in October being the first Thursday, the 5th.

Mrs. Broder of Oakland who has been the guest of Mrs. Ralph Hyde for the past week has returned to her home. Mr. Broder came down for over Sunday and the two families motored to the Big Basin for the day.

The lay delegates to the M. E. Conference at Santa Cruz with the Rev. and Mrs. Lloyd have returned. The other residents of Campbell unite in the pleasure of the local church in the return of their pastor for another year.

Store News

Those **Flannelettes** are selling at a lively rate. Don't be among the folks who wait for an eleventh hour selection. The price, you know, is 12½c a yard.

After the summer work is over there will be a renewed interest in Tatting and Crocheting. Our stock of threads for these purposes is being gradually increased. Remember, we have the pure silk thread for this work, too. Also when you want tatting shuttles or crochet needles we should like to supply you.

We are still selling Burson's Hose for 25c. Some stores are asking 35c for the former 25c grades of ladies' stockings. A lady, a former Campbellite, sent us a mail order for Burson's Hose all the way from New Mexico. A good recommendation for Burson's, is it not?

In the groceries we have added Lorna Doone Shortbread in bulk. You will find this an excellent tea biscuit.

Another big sack of raw Peanuts for roasting at home. Serve them occasionally as a part of the regular meal. They are wholesome and nutritious. 10c a pound straight, not three for a quarter, this time.

Oranges are scarce and high priced just now. The flavor, however, is very good. Valencias are the only variety in the market at this season. They are pale in color but taste better than they look. 30c a dozen.

GO BACK TO OLD REMEDIES

War Brings a Return to Medicines Used in the Days of Our Grandfathers.

Physicians have been jumping from one drug or chemical to another ever since Lister found a way to check or prevent the infection of wounds. Doctors have tried friars balsam, carbolic acid, iodoform and dozens of other antiseptics, some of them very costly, and now seem to have gone back to old fashioned household dressings of past years and even past centuries.

On the battlefields of Europe sugar, salt, tincture of iodine and common garlic have superseded drugs and chemicals with high sounding names, the New York Commercial states. Sugar is used as a dressing for wounds already infected. The British government has found that wounded men on ships whose injuries have been washed with common sea water make better recoveries than those treated in field hospitals, the conclusion being that the waters of the ocean are an ideal antiseptic. Tincture of iodine, a preparation as old as the hills, is the favorite protection against lockjaw; and so it goes.

Of all these reversions to grandmother's specifics, however, the discovery that garlic is almost a cureall is the most striking. Doctors who prescribe and use only the most costly and new-fangled preparations imported from Germany will have to give respectful attention to garlic, for its efficacy is vouched for by the London Lancet on the testimony of two eminent London surgeons. Garlic applied to a wound stops the infection and heals quickly, whereas modern antiseptics used in fashionable practice injure the tissues. Garlic has been tested thoroughly at the Paddington infirmary in London, as well as in field hospitals in France.

The story of the rediscovery of garlic possesses human interest. An old French peasant woman was found to have dressed the sores and wounds of soldiers in the wa. zone with remarkable results. An army surgeon investigated and garlic is sold by the ton where it was formerly sold by the ounce in England chemists' shops. Garlic juice diluted with three or four parts of distilled water seems to be the standard dressing.

Garlic is also found to be effective in preventing tuberculosis and in curing it in its early stages. The common onion, cousin of the clove of garlic, is good for colds. Hindus have used plasters of garlic for ages. Just when speculators have cornered the drug and chemical market, army doctors find substitutes in things that are cheap and plentiful.

BEYOND MEASURE OF YEARS

Geologic Time Cannot Be Computed by the Ordinary Methods of Science.

Scientists hesitate to estimate geologic time in terms of years. Such estimates have, however, been made, and one published by Prof. Charles Schuchert in 1910 states that about 12,000,000 years have elapsed since the close of the Carboniferous age, an age, as the name suggests, in which great deposits of carbon, in coal, were being formed in many parts of the world. This age has been divided by geologists into the Mississippian, Pennsylvania and Permian epochs, of which the Mississippian is the oldest and the Permian the youngest. The Pennsylvanian epoch alone is estimated by Schuchert to have covered 2,160,000 years, and animal life is supposed to have existed on the earth for over 14,000,000 years before that time. Geologic periods are recognized primarily by the animals and plants that lived in them, so that the study of fossils plays a very real and important part in the progress of geologic knowledge. Rocks of Carboniferous age, as shown in their fossils, have a wide distribution in the United States, and they are apt to abound in these remains of plant and animal life. The fossil shells which are found in them, however, may vary greatly from point to point, because the animals they represent lived in different periods of geologic time or in different regions in the Carboniferous ocean.

Flameless Guns.

Airships equipped with machine guns run a certain degree of risk from an explosion caused by the flame at the muzzle of the gun. Hence considerable study has been devoted to obviating this danger. This has now been accomplished by a young Florentine chemist named Guido Fei. He is said to have recently given a demonstration before an Italian military commission of a new powder invented by him which burns without either flame or smoke and does not flare up on detonation. While specially useful for the guns of aircraft, it will be of value in artillery and infantry engagements from the fact that it will not betray the firing line to the enemy.

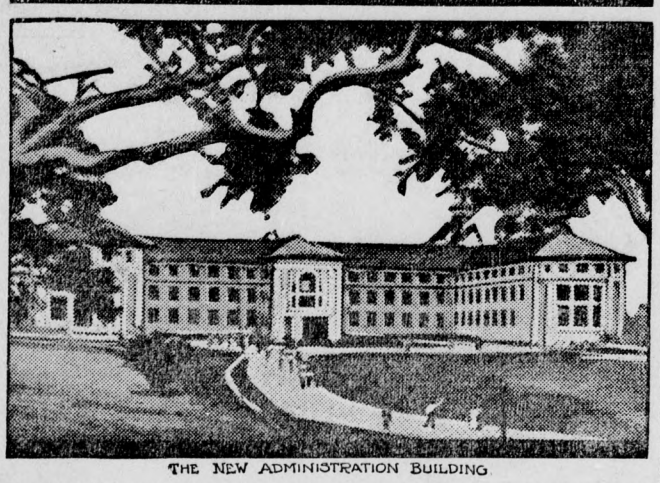
How He Looked.

"Who is this Gargantua just coming in?"

"That's Fatleigh, who is always bragging about being a self-made man."

"Gee whiz! He looks more like he was built by a construction company."—Boston Transcript.

Capital of the Canal Zone



THE NEW ADMINISTRATION BUILDING.

HAVING acquired a narrow strip of land through foreign territory and built therein the great Panama canal, Uncle Sam quite naturally felt that, as the work neared completion, there also should be a capital city from which the strip could be governed and the canal managed. Therefore he built Balboa. Balboa is the permanent town at the southern end of the canal, is the seat of government, the residence of the governor and the headquarters of canal construction and management. In short, it is to the Canal Zone what Washington is to the United States.

Balboa was named in honor of Vasco Nunez de Balboa, who, "silent, upon a peak in Darien," first saw the distant waters of the Pacific ocean and thus became known to history as its discoverer, writes H. H. Updegraff, in the St. Louis Republic.

The town of Balboa is not the first village that Uncle Sam has built along the route of the canal. It probably will be the last, however. But, unlike these others, which were no more than wooden construction camps, Balboa is permanent in character. It is to last as long as the canal, which, indeed, is as long as time itself. There is another difference between this new town, this capital of the Canal Zone, and the other canal villages, and that is that much more money has been and is being spent to make it the most attractive place of residence on the entire isthmus. In fact, it is Uncle Sam's model town.

An American Community.

Notwithstanding its wholly unamerican name, Balboa is a thoroughly American community. Its inhabitants are all American, for it was built with the intention of giving the American canal workers and operatives an ideal spot in which to have their homes, in which to rear their children under proper American surroundings, and where it would be possible to have a wholesome American atmosphere. The only foreigners who are part of the life in Balboa are the West Indian negro servants, most of whom, however, live elsewhere.

While Balboa is wholly American, it is yet quite unlike any American city or town of its size "back home" in the states. It has absolutely no political atmosphere. It is difficult to conceive an American town, no matter how small, that has no mayor, no city council, no political boss and hence no politics. Balboa has none of these.

The Canal Zone is prohibiton territory and, therefore, Balboa has not a single saloon within its limits. In this respect it also is different from a majority of the cities and towns "back home." The "poor man's club" is wholly unknown, not only because there are no poor men on the Canal Zone, but also because they are prohibited. The occasional tippler must either maintain his own private little bar in his own home or journey to the neighboring city of Panama, where the "cantinas" are both numerous and well stocked and where everything is wide open and the bars never close.

In place of the "poor man's club" of the cities "back home" there is the spacious building of the Young Men's Christian association which fills all the needs of club for the men, meeting place for the women's societies and playhouse for the children. A separate, as well as general, room or rooms is reserved for each. Not far away is the 25-acre athletic field which is now under construction with a lavishness and detail such as no politically self-governed city in the United States can boast of. It was all done without expense to the population for there are no taxes to be paid in this model town of Uncle Sam's.

Site Was Once a Swamp.

The site of Balboa, between Ancon and Sosa hills, originally was a swamp which was filled in. It was chosen because of its proximity to the huge machine shops and other canal activities at the southern end of the waterway. It also was chosen because it would be near the capital city, Panama, of the Republic of Panama and would, therefore, place the two capitals into quick communication. This was necessary because of the varied interelationship between the two countries due to the building and operation of the Panama canal.

Only a small portion, however, is built on the former swamp and this is made up of what might be termed the civic center. On Ancon hill, behind the handsome new administration building, is really the best and prettiest section. Here are the official residences clustered about the governor's house around which the social life of the community in time to come will revolve. Across the former swamp toward the west in Sosa hill on which many of the new concrete two and four-family houses have been built. At the foot of Sosa hill and facing the administration building are the huge Y. M. C. A., the new commissary and its companion refrigerating plant.

When the town was planned it was the intention to so construct the buildings that all would harmonize in architecture. This has been carried out with so rigid a resolve that perhaps the uniformity in a measure spoils the effect of the whole. There is nothing along the Prado, for instance, to relieve the eye of the sameness of the eight concrete houses that face the central parkway. They are all alike, in design, in size and interior furnishing. They were cast in the same concrete mold. There is a stilted formality about them that jars, but which undoubtedly prevents the jealousy which would be aroused were there a possibility of choice.

Balboa Heights Attractive.

The town of Balboa is virtually divided into four sections. East of the new administration building, which naturally dominates the business life of the town, on the sloping side of Ancon hill, is the official residence quarter. This section is frequently referred to as Balboa Heights. It is here that the real beauty of the village is to be seen. In time, no doubt when nature has completed its work, the other sections will equal and, perhaps, surpass it in attractiveness. Its present advantages are due to having been planned and constructed first and its natural advantages regarding location.

South of Balboa Heights is another flat hilltop which has in recent months become known as Quarry Heights, or sometimes Military Heights. The latter is used because it is the site of the large and handsome home of the commanding general of the United States troops and his staff officers. Farther south still is the permanent camp of the provost guard or military police.

At the foot of the hill on which the new administration building stands, and also near the bottom of the hill on which is the governor's house, which overlooks the tract, there is a large flat bottom land that, too, formerly was a huge swamp. It comprises about 1,000 acres and was filled in by the spoil from the dredges excavating the inner harbor of Balboa. The salt water has killed all the vegetation, which, however, was neither plentiful nor valuable. A top dressing of rich soil will eventually be given this tract and then it will grow anything. When money is available it is planned to transform this bottom land into a large, handsome park.

Between Ancon hill and Sosa hill is Balboa Flats, so called from the fact that it was built on the only level part of the new town. A part of the flats, however, is on the slope of Sosa hill and overlooks the Prado and flats proper from the west. The central feature of the flats is the Prado, which forms a wide double roadway down the center. On it are the commissary, the Y. M. C. A., the dispensary, fire and police stations and the high school. Also there are eight four-family houses. A large part of the flats is to be utilized for the magnificent new athletic field now under construction.

Why Orchestras Tune Up.

"Why," asked a visitor to the theater the other day, "do members of the orchestra always worry people possessing nerves, like myself, by tuning up their instruments?"

It is all a matter of thermometer, according to a musician. The temperature in different parts of the building is different and the instruments have to be tuned in which they are played. As a rule, the air in a theater becomes warmer as the performance progresses and so the instruments have to be tuned several times.

FAMOUS OLD PORT

MARSEILLES A POINT OF IMPORTANCE FOR CENTURIES.

French City, Older Than the Country Itself, Is Now the Naval Base of the Forces of the Entente Allies.

"Marseilles, the unwearied contestant for Mediterranean trade during 26 centuries, and the city wherein the earliest naval traditions of France were formed, whence fleets were sent before Rome's day of power to challenge the great Mediterranean port-city, Carthage, is today the principal naval base for the allies upon the Middle ocean; and, with the shifting of the stress of the world-war toward the east, to the Balkans, to Turkey-in-Europe, to Syria and Mesopotamia, it is become a place of first strategic consequence, while, from its harbor, a steady stream of the 'sinews of warfare' is pouring into the vital fields bordering the Eastern seacoast," begins the primer on war geography issued today by the National Geographic society.

"Marseilles has been an important city through all of Europe's historic ages. It has been in competition for the commerce of its inland sea from earliest times; has seen its competitors, one by one, reach their zenith and decline, while it still remains a foremost Mediterranean port. Its rivals today are of the younger set of cities, Genoa, comparatively youthful, and Triest, a newcomer into the fold of contending world-ports.

"Genoa, though of about equal age with Marseilles as a harbor, first came into commercial fame during the early middle ages. Sidon, Tyre, Athens, Corinth, Carthage, Ragusa, Pisa, Venice and a host of other cities have at one time and another fought a bitter rivalry with Marseilles, and of some of these even the history of their efforts is forgotten, while their one-time rival has passed through several declines toward an even greater future.

"Tracing its descent from early Phenician times, the fortunes of Marseilles have fluctuated with the fortunes of civilization upon the Mediterranean coasts. The Phoceans, a Greek people whose trading instincts carried them beyond the confines of the known world of their day, came after the Phenicians, took Marseilles from them and made it the New York of the ancient world. Due to their enterprise Marseilles became the first of trading cities, and, during the Punic wars, its aid saved Rome.

"Situated in the center of things Mediterranean on the Gulf of the Lion, enjoying the advantages of an excellent harbor, well equipped, together with a rich and productive hinterland, Marseilles has again become the first port on the inland sea, the first port of France, the second city of the republic and one of the wealthiest communities in Europe. It lies 534 miles south-southeast of Paris, with which it is connected by the Paris-Lyon-Mediterranee railway. The manufacturing city of Lyons lies 219 miles to the north upon the River Rhone, whose principal channel reaches the Mediterranean sea, 25 miles west of Marseilles.

"While Marseilles possesses few architectural extravagances, it is well and solidly built and thoroughly modern. It has preserved no interesting remains from ancient times; for the modern spirit, which has characterized its long life, has left it little appetite for reminiscence, and the wars that have swept over it have destroyed much of its heritage. The public works of the city and its conveniences, however, are on a par with those of the best-administered municipalities of today.

"The port does a vast export and import in peace times; buying cattle, coffee, raw cotton and silk, hides and grain, and selling cotton and woolen goods, ribbons, soap, silk, sugar, grain, fruits, wine, oil and perfumes. Its shipping business is carried on along 12 miles of model quays where 2,500 vessels can be accommodated at one time."

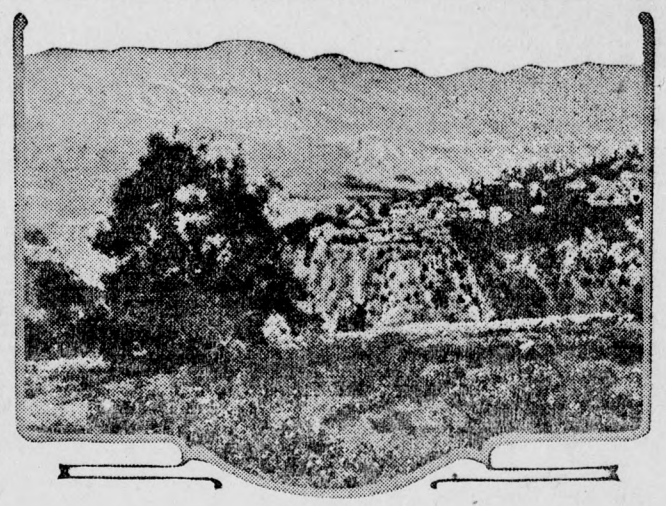
Lightning's Freak.

Lightning recently at Spartansburg, S. C., snapped around the premises of J. Y. Cantrell. His two children, sitting in a swing fastened to one of two trees situated close together, had their dresses scorched by a bolt of lightning which struck the tree, tearing the bark off in places but not hurting the children in the least. Four mules hitched to a wagon in the road just opposite the tree were knocked down, one being killed. A fence 40 feet farther down the road was set on fire. A single bolt of lightning performed the whole feat. Besides knocking down the four mules hitched to the wagon in the road the lightning made a hole as large as a water bucket just behind the wagon. The bolt set the fence of a hogpen afire which was on the opposite side from the two trees, and at least 40 feet down the road.

Prussian Cities Buy Milch Goats.

A number of German cities have taken practical steps to solve the milk problem, which still is very serious in the large centers of population. Twelve of the largest Prussian municipalities have bought 75,000 goats in Switzerland. The animals have been turned over to the owners of small farms in the suburbs of the cities on condition that they deliver 70 per cent of the milk obtained from the goats to the relief stations, where it is distributed among poor families with small children. The goats furnish 200,000 quarts of milk a day.

Agriculture in Syria



Syrian Landscape.

THAT Syria has been unable to feed its own Christian population and at the same time satisfy the military authorities' extraordinary demands for supplies is not surprising to those familiar with the primitive agricultural methods of the Holy Land. Concerning the manner in which crops are raised in this section of the near East, where 50,000 people are reported to have perished already, John D. Whiting presents this graphic picture in a communication to the National Geographic society:

In the mountain districts the farm land is usually owned by peasant proprietors, each man's property being composed of various small pieces scattered about near the village in which he lives. The raising of olives, grapes and many other fruits is the leading occupation, but almost every farmer grows some grain.

Down on the plains larger fields exist and cereals are largely planted. The land of a given village is frequently owned in common by the villagers and a division of it takes place every alternate year, and is so arranged that every man gets portions of the good as well as of the less desirable land.

Fences, in the western sense of the word, are unknown. In the mountainous country lands are inclosed by loose stone walls, still called by the ancient Hebrew name "jedar," and on the plains by thorn hedges. When the open fields are owned by individuals, the boundary lines are indicated by deep furrows, in which at intervals stones are laid as landmarks. It is therefore, readily seen how easily these boundaries could be changed by an avaricious neighbor, undeterred by the Mosaic warning, "Cursed be he that removeth his neighbor's landmark."

Crude Methods of Farming.

Rain begins to fall about November (average annual rainfall for 50 years about 26 inches), after a rainless summer, and as soon as the ground is well moistened the fellah starts planting the winter cereals—wheat, barley, lentils, beans, etc. The plow is a crude affair, made of oak, the bent parts being natural curves held together with iron bands; these bands and a small plowshare, which only scratches the ground a few inches deep, are the only metal parts.

Oxen are the favorite animals for yoking to a plow. Cows and donkeys are employed by the poorer people. Horses, mules and camels (the last named only along the Mediterranean coast) are harnessed singly to plows, while sometimes one sees an ox and a camel yoked together.

The fellah sows the grain on the bare ground and then plows it in. In rocky ground man or woman follows with a pick to loosen the earth that may have been skipped by the plow. The soil is not fertilized. The disintegration of the underlying limestone feeds the soil, so that for thousands of years it has continued yielding crops. The manure and rubbish, instead of being utilized, are allowed to accumulate in heaps outside the villages until they surround it like small mountains.

After the winter crops have all been planted the vineyards and olive groves are plowed a couple of times and also the fields reserved for the summer planting, these latter crops are not put into the ground until the rains have entirely ceased.

Harvest Time Scenes.

During harvest time the fields are lively and picturesque; the entire family has a part in the work, the small children playing about among the sheaves and even the babies are brought into the fields. A large toothed sickle is employed by the reapers when the grain is long, but if short a smaller one is used, the edge being quite dull; so that it does not cut but simply uproots the grain.

Destitute women and girls are allowed to follow the reapers and glean the fallen ears, which they tie into neat little bundles, dropping them on the ground as they go along, and these they gather up every evening and beat out the grain with a stick, just as Ruth did of old in the fields of Bethlehem. During the reaping period what the Bible calls "parched corn," is made in almost every field. Some wheat not fully ripe is cut down and set on fire, the straw only being consumed. The roasted heads are rubbed between the hands and the chaff winnowed out in the wind. Without further preparation, this roasted wheat forms one of the common articles of diet of the reapers. Undoubtedly such was the parched corn which Boaz gave to Ruth.

Threshing by the primitive methods employed is the most tiresome task of all the fellah's round of toil. In many places it is done entirely by treading out beneath the feet of the animals which are tied together abreast and driven round and round over the spread-out grain. The mules and horses are provided with flat sheet-iron shoes for all kinds of work, and the cattle, just as the threshing season begins, are specially shod.

As soon as the grapes, figs and other fruits begin ripening the fellah, with his entire family, moves out of the village into the vineyard. The grape season is looked forward to as the best part of the year, and at this time the natives live for the most part on fruits and bread. Jokingly the fellaheen say that they get so fat from eating grapes that their fezzes burst.

Olives are harvested in the fall, but by a method so injurious to the trees that they yield a full crop but once in two years. Instead of picking them by hand, for time is not money with these easy-going people, they beat the trees with sticks to knock off the fruit, which at the same time results in destroying the tender shoots which should bear the next year's fruit. The olives when salted or pickled in brine are valued food, for a peasant can make a meal of only bread and olives, with perhaps the addition of a raw onion.

Sheep as well as goats are milked by the women, and the milk turned into cheese and butter. Butter is made in a goat skin like those used for carrying water. This is only half filled with milk which has previously been allowed to sour. The skin is blown full of air, the opening tied up, and it is hung on a triped of sticks and shaken back and forth by one or two women until the butter is formed.

Russian Business Methods.

Illustrating Russian deliberation in business affairs, R. W. Child in Everybody's says that an American business man went to Petrograd to sell war goods which were badly needed. Instead of orders he received invitations to dinner, first from one high official, then another. After a week of this he said to the bureaucrat whose word was final, "Look here, this may be the Russian way; I will indulge in it if you wish, but the American way is to charge the cost of production and sales to the price. My expenses are large. Each day from now on I will add these charges to the price." He was as good as his word, and charged $400 a day extra till the negotiations were completed, ten days later, when he got his contract.

Paradise for Birds.

Conyers Manor, the 2,500-acre farm of E. C. Converse near Greenwich, Conn., is looking its best these days, and it is expected that the yield of peaches will be fully 8,000 baskets. The apple orchards are in the same thrifty condition, while the acres of strawberry beds, raspberry and current bushes are loaded with fruit.

Much work is being done on the estate to encourage bird life. In this connection the lake is being prepared so that water fowl will be safe, and a large number of snapping turtles, weighing from five to thirty pounds each, have been caught. This work will be continued until the lake is practically free of enemies of the water fowl.

Her Mistake.

Edith—Betty is such a talker I positively couldn't get a word in edgewise.

Ethel—Oh, that's because you let her get the first start.—Boston Transcript.

Reducing the Effort.

"Is your boy Josh a student of efficiency and conservation of energy and that sort of thing?"

"Yes," replied Farmer Corntossel; "he's learnin' to roll a cigarette with one hand."

THE BETTER THING.

It is better to lose with a conscience clean
Than to win by a trick unfair;
It is better to fail and to know you've been,
Whatever the prize was, square,
Than to claim the joy of a far-off goal
And the cheers of the standers-by,
And to know down deep in your inmost soul
A cheat you must live and die.

Who wins by trick may take the prize,
And at first he may think it sweet,
But many a day in the future lies
When he'll wish he had met defeat;
For the man who lost shall be glad at heart
And walk with his head up high,
While his conqueror knows he must play the part
Of a cheat and a living lie.

The prize seems fair when the fight is on,
But save it is truly won
You will hate the thing when the crowds are gone,
For it stands for a false deed done,
And it's better you never should reach your goal
Than ever success to buy
At the price of knowing down in your soul
That your glory is all a lie.
—Detroit Free Press.

Varying Value of Diamonds.

In regard to the relative value of diamonds of different colors, it may be said, generally, that the perfectly transparent, uncolored stones, which show no hues except those produced by refraction, stand at the head. Sometimes a tinted gem, if possessing extraordinary "fire," and of considerable size, may excel in value. The Russian crown, for instance, has a deep red diamond, which, because of its rarity, is very highly valued.

Old-Time Parlor Has Gone Into the Discard; Living Room Has Taken Its Place.

That we are becoming a parlorless nation is one of the interesting developments in modern domestic architecture. This disappearance of the parlor and the evolution of the living room is typical of the new social feeling and marks the change from the conventional and superficial to the more informal and intimate intercourse of the present day.

This movement, begun in the apartment house and developed in the bungalow, was probably brought about by the limitations of space, as well as by the increased cost of building a house. The praiseworthy desire of simplifying the house may have contributed also to the result. But, whatever the cause, the fact surely remains that, however large the house or numerous the rooms, there seems to be no place for the parlor.

So the parlor, which was once the most important room in the house, is now crowded out or else relegated to a corner of the hall, with two chairs and a palm.

The living room is all that its name suggests. Comfortably furnished, well lighted and with no useless ornaments to be sidestepped or knocked down, it belongs to the man quite as much as to the woman, which is, perhaps, the finest thing about it.

Mexican Cactus, at Once a Pest and a Joy, Is One of Most Curious of All Plants.

Of all the curious plants in the world's vast array of vegetation, there is none around which center so many different beliefs, so many conflicting opinions and so many degrees of appreciation as the cactus of Mexico, whose names are legion and whose varieties number into the thousands.

This peculiar plant is at once considered a pest and a joy, for it is the bane of the traveler, the eyesore to the ranchman and the treasure of the peon, to whom it is a source of livelihood, a food and drink.

Mexico is particularly rich in its range of cactus plants. Owing to its climatic and soil conditions it has countless varieties of all sizes and shapes and all colors of flowers and fruits.

The peon is concerned chiefly with the species of the cactus or prickly pear that is edible, and this he cultivates and harvests in precisely the same fashion today as his ancient Aztec forbears did before Cortez marched his conquering hosts across Montezuma's domains and set up the standard of Spain upon the royal palace to proclaim his conquest.

A FEW SMILES

Creating "Atmosphere"

"Did I understand you to say that you have been rusticating in the country?"

"Not in the country," answered the flat dweller. "I've simply been sitting around home, smoking a corncob pipe and reading a farm magazine."

Questioning His Motives.

"Dubwaite seems to be a public-spirited citizen."

"Yes?"

"He's always writing letters to the editor of his local paper, criticizing the city authorities."

"Well, I don't want to do Dubwaite an injustice, but I happen to remember that he was an alderman before the commission form of government was adopted."

Sad Disillusion.

"Tough luck for a pretty nurse."

"What happened to her?"

"While one of her patients was delirious he babbled continuously of his wealth."

"Just so."

"She married him and discovered later that he was worth, all told, about $12.80."

Spoiling His Day.

"Ah! Cultivating your mind, I see," remarked the cheerful bore.

"What makes you think so?"

"Why—er—the book in your hand."

"Umph! This book contains the latest statistics on the high cost of living as compared with prices in my grandfather's day. What I'm cultivating at the present moment is a grouch."

Hardships of Travel.

"Boss, could yer give a dime to a flood sufferer?" asked the tramp.

"How could the floods have injured you?" said the cautious philanthropist. "I dare say you had no property to be destroyed."

"No, sir. But I wuz on me way up nort' an' freight trains has been so delayed by de high water dat dey ain't no tellin' when I'll reach me destination."

CALOMEL MAKES YOU SICK, UGH!

"Dodson's Liver Tone" better than calomel and can not salivate.

Calomel loses you a day! You know what calomel is. It's mercury; quicksilver. Calomel is dangerous. It crashes into sour bile like dynamite, cramping and sickening you. Calomel attacks the bones and should never be put into your system.

When you feel bilious, sluggish, constipated and all knocked out and believe you need a dose of dangerous calomel just remember that your druggist sells for 50 cents a large bottle of Dodson's Liver Tone, which is entirely vegetable and pleasant to take and is a perfect substitute for calomel. It is guaranteed to start your liver without stirring you up inside, and can not salivate.

Don't take calomel! It makes you sick the next day; it loses you a day's work. Dodson's Liver Tone straightens you right up and you feel great. Give it to the children because it is perfectly harmless and doesn't gripe.—Adv.

When Glass Adheres.

If sheets of plate glass be piled up horizontally to a considerable height without the precaution of separating them by sheets of paper, the glass in certain places adheres as tightly as if it were cemented, so that it is necessary to remove it bit by bit. This is due solely to cohesion, which is the property of bodies to adhere as soon as their molecules are in contact. It is almost impossible to make surfaces so smooth and to exert pressure so great that the molecules of the two surfaces will actually be in intimate contact, but in certain machines this does occasionally take place with both steel and lead, effecting a sort of welding so perfect that even the microscope cannot detect the place of union.

Worked Both Ways

Dibbles—What are you doing now?

Scribbles—Running a society paper.

Dibbles—Well that ought to be a winning proposition. Lots of people are willing to pay to see their names in print.

Scribbles—Yes; but I get more out of those who don't want to see their names in print.

Foolish Expense.

Topping—The doctor says I can't play golf.

Brassie—You did't pay him a fee for that?—Boston Transcript.

MOTHERS AND DAUGHTERS OF CALIFORNIA, TAKE THIS ADVICE!

San Francisco, Cal.—"When my daughter was 19 she had the most extreme form of female trouble. I gave her 12 bottles of Dr. Pierce's Favorite Prescription; it cured her. She has never had any return of the trouble.

"I have taken Dr. Pierce's Pleasant Pellets for years to keep my bowels regular. One pill a week was all I had to take. I am 73 years old and attribute my splendid health to this."—MRS. E. BLEVIN, 624 Castro St.

Dr. Pierce's Favorite Prescription is a true friend to women in times of trial and at times of pain when the organs are not performing their functions. For headache, backache, hot flashes, catarrhal condition, bearing-down sensation, mental depression, dizziness, fainting spells, lassitude or exhaustion women should never fail to take this tried and true woman's medicine. It is a remedy that any ailing woman can safely take because it is prepared from native roots and herbs.

It's not a secret remedy for all the ingredients are printed on the wrapper. Sold in either liquid or tablet form.

Sick people are invited to consult Dr. Pierce by letter, *free*. All correspondence is held as strictly private and sacredly confidential.

Send three dimes (or stamps) for mailing charges to Dr. Pierce's Invalids' Hotel, Buffalo, N. Y., and enclose this notice and you will receive a copy of the "Common Sense Medical Adviser," all charges prepaid.

Dr. Pierce's Pellets are unequaled as a Liver Pill. *Smallest, easiest to take. One tiny, Sugar-coated Pellet a Dose.* Cure Sick Headache, Bilious Headache, Dizziness, Constipation, Indigestion, Bilious attacks, and all derangements of the Liver, Stomach and Bowels.

HERE'S ONE OF REASONS WHY EVERS HATES UMPS

Captain of Braves Tells About Run-in He Had With Official in Game at St. Louis Several Years Ago.

Johnny Evers tells about a run-in he had with Umpire Rigler at St. Louis some years ago. "The fans in St. Louis always rode me there," said Evers, laughing. "They never seemed to let up on me. They'd call me a crab and all that. It was a bit annoying, but I paid no attention to them.

"Finally, one series, we were playing our last game with the Cards. It came to the ninth inning and we Cubs were ahead something like seven to one. It was easy going for us, but still those fans continued to ride me.

Johnny Evers.

"Two were out and none on base in that ninth when I came to bat. O'Connor was catching for St. Louis and Rigler was behind him, umpiring.

"I turned toward those fans and, in an undertone said: 'You big stiffs, you.'

"Like a flash Rigler was on me. 'Get out of the game,' he ordered. I was amazed.

"O'Connor took off his mask. 'I say, nobody heard that but you and me, Rigler,' he said.

"'Can't help it,' said Rigler, 'he can't get away with that stuff when I'm around.'

"Out I went to the clubhouse, although two were out and we had the game cinched a mile. As I strolled away I heard those fans yell joyously: 'Aha. So you got it at last, eh? Aha!'"

Although Evers closed his story here, it was evident that this was merely one of the many reasons why he has little use for umpires.

Plants Have at Least Three Senses, Declares Botanist.

James Rodway, who is the curator of the British Guiana museum and an eminent botanist, declares that plants have at least three of our five senses—feeling, taste and smell—and that certain tropical trees smell water from a distance and will move straight toward it.

But trees not in the tropics can do as well. A resident of an old Scottish mansion, says a writer in the Scotsman, found the waste pipe from the house repeatedly choked. Lifting the slabs in the basement paving he discovered that the pipe was completely encircled by poplar roots. They belonged to a tree that grew some 300 yards away on the opposite side of the house.

Thus the roots had moved steadily toward the house and had penetrated below the foundation and across the basement until they reached their goal, the waste pipe, 150 feet away. Then they had pierced a cement joining and had worked their way in. There seems something almost human in such unerring instinct and perseverance in surmounting obstacles.

The Flag of Denmark.

The flag of Denmark is a plain red banner bearing on it a white cross, and is the oldest national flag now in existence. For over 300 years Norway and Sweden were united with Denmark under this flag. In the year 1219 Kind Waldemar of Denmark, when leading his troops to battle against the Livonians, saw—or thought he saw—a bright light in the form of a cross in the sky. He held this appearance to be a promise of Divine aid, and pressed forward to victory. From this time he had the cross placed on the flag of his country and called it the Dannebrog—the "strength of Denmark."

The Difference.

Among the many things we admire in woman, says an Ohio paper, is the way she can dine once a year at some fashionable hotel and use the finger bowl with the utmost sang froid, whereas her husband counts himself remarkably fortunate if he doesn't actually knock the thing off the table.

Spectacles for Cows.

The idea of cows wearing spectacles seems ridiculous. Nevertheless there are cows that do wear spectacles, and they may be seen on the plains or steppes of Russia, which are covered with snow more than six months of the year. The cows subsist on the tufts of grass which crop above the snow, and the rays of the sun on the snow are so dazzling as to cause blindness. It occurred to a kind-hearted man to protect the cows' eyes in the same way as those of human beings, and he manufactured smoke-colored spectacles which could be worn by cattle. These spectacles proved a great success and are now worn by upward of 10,000 head of cattle. The animals no longer suffer from snow blindness, which once caused such untold suffering among them.

Sore Eyes
Granulated Eyelids, Eyes inflamed by exposure to Sun, Dust and Wind quickly relieved by Murine Eye Remedy. No Smarting, just Eye Comfort. At Your Druggist's 50c per Bottle. Murine Eye Salve in Tubes 25c. For Book of the Eye Free ask Druggists or Murine Eye Remedy Co., Chicago

Why Men Are Bald.

Men get bald more frequently than women, according to a scientist, because they wear hard, heavy hats, they cut their hair too short, and they eat more than women. The "doc" says the scalp is like soil, and the hair like the vegetation that grows upon it. When the scalp is neglected the hair does not grow and its roots die, just as grass dies when the soil is poor. A heavy, hard hat constricts the blood vessels that nourish the scalp. Clipping the hair short leaves its tender roots at the mercy of the cold, heat and dust. The oil that exudes from around the roots of the hairs and keeps them nourished is coagulated by the cold and chokes up the matrix in which the hair is formed.

Shake Into Your Shoes
Allen's Foot-Ease, a powder for the feet. It cures painful, swollen, smarting, sweating feet. Makes new shoes easy. Sold by all Druggists and Shoe Stores. Don't accept any substitute. Sample FREE. Address A. S. Olmsted, Le Roy, N. Y.—Adv.

Consideration.

"I don't believe Josh learned so very much at school," remarked Farmer Corntossel.

"Don't believe it," replied his wife. "He didn't show off much because he didn't want to embarrass you by lettin' on how much more he knows than you do."

Some Devotion.

Isabel—Are you sure you really love me?

Arthur—Dearest, I would be President of Mexico for your sake.—Cornell Widow.

WHEN WRITING ADVERTISERS PLEASE MENTION THIS PAPER.

Finn Boy Escapes Jail Sentence.

It may be true that "there is nothing new under the sun,' but Judge Howard's daily experience in the municipal court of Rockland brings up lots of things that are new to him. Among the offenders who faced him the other day was a Finn boy who had been arrested for shooting a raccoon out of season. The boy did not deny the act, but asked the court to hear his defense, which he read from manuscript prepared by himself. It was an ingenious setting forth of the circumstances which led to the coon's destruction—a tale of how the glaring eyes of a strange animal had frightened belated pedestrians in a West Rockford suburb; how a frightened woman had implored him to "get a gun and shoot the creature." The young Finn's "brief" was so well prepared that Judge Howard suspended sentence.—Augusta (Me.) Kennebec Journal.

GIRL COULD NOT WORK

How She Was Relieved from Pain by Lydia E. Pinkham's Vegetable Compound.

Taunton, Mass.—"I had pains in both sides and when my periods came I had to stay at home from work and suffer a long time. One day a woman came to our house and asked my mother why I was suffering. Mother told her that I suffered every month and she said, 'Why don't you buy a bottle of Lydia E. Pinkham's Vegetable Compound?' My mother bought it and the next month I was so well that I worked all the month without staying at home a day. I am in good health now and have told lots of girls about it."—Miss CLARICE MORIN, 22 Russell Street, Taunton, Mass.

Thousands of girls suffer in silence every month rather than consult a physician. If girls who are troubled with painful or irregular periods, backache, headache, dragging-down sensations, fainting spells or indigestion would take Lydia E. Pinkham's Vegetable Compound, a safe and pure remedy made from roots and herbs, much suffering might be avoided.

Write to Lydia E. Pinkham Medicine Co., Lynn, Mass. (confidential) for free advice which will prove helpful

One of the most fascinating and inspiring plays ever staged was shown at the Victory last week when the "Mission Play" played to packed houses. From an historical point of view it has no equal for Californians and no one should miss the opportunity of seeing it.

We denounce all plots and conspiracies in the interest of any foreign nation.

ROOSEVELT APPLAUDS HUGHES' SPEECH

Theodore Roosevelt sat in a box at Carnegie hall when Mr. Hughes delivered his speech of acceptance and vigorously applauded every telling point.

The colonel repeatedly arose and bowed in response to the cheers for him and the shouts of "Teddy!" "Teddy!" "Hurrah for Teddy!" and when the meeting adjourned he made the following statement:

"It is an admirable speech, and I wish to call attention to the following points:

"I am particularly pleased with the exposure of the folly, and worse than folly, of Mr. Wilson's Mexican policy and of the way in which this policy has brought humiliation to the United States and disaster to Mexico itself.

"Moreover, I am very glad of the straightforward manner in which Mr. Hughes has shown the ridicule with which Mr. Wilson has covered this nation by the manner in which he allowed foreign powers to gain the impression that, although he used the strongest words in diplomacy, they were not to be taken seriously.

Not Words Which Count.

"As Mr. Hughes said, it is not words, but the strength and resolution behind the words which count. As Mr. Hughes pointed out, there is no doubt that if Mr. Wilson's conduct and action had been such as to make the foreign nations believe that he meant precisely what he said in his 'strict accountability' there would have been no estruction of American lives by the sinking of the Lusitania.

"When Mr. Hughes uses strong words his record shows that they are always backed by strong deeds, and therefore in the enormous majority of cases the use of strong words renders it unnecessary ever to have recourse to strong deeds.

"Again, Mr. Hughes speaks in characteristically straightforward fashion of the outrages committed on munitions plants, and all men, whether citizens of foreign nations or nominal citizens of our own land, who had in any shape or way abetted or condoned those actions can understand that Mr. Hughes, if president, will protect these domestic American interests and punish offenders against them with the fearlessness and thoroughness that he showed in dealing with the powers of evil at Albany.

Brought Nation to Ignominy.

"Just before coming in to listen to Mr. Hughes' just characterization of Mr. Wilson's failure to protect the lives and property of Americans in Mexico and on the high seas I happened to pick up John Fiske's 'Critical Period of American History' and was struck by the following two sentences:

"'A government touches the lowest point of ignominy when it confesses its inability to protect the lives and the property of its citizens. A government which has come to this has failed in discharging the primary function of government and forthwith ceases to have any reason for existing.'

"Mr. Hughes has pointed out in his speech with self restraint, but with emphasis, that it is precisely this primary function which Mr. Wilson's administration has failed to discharge and that it is precisely this point of ignominy to which he has reduced the nation over which he is president."

WHAT ONE BIG MAN THINKS OF ANOTHER.

President W. H. P. Faunce of Brown university is a pretty live wire who keeps abreast of the times, has keen powers of observation and knows a good man when he sees him. Here is what he has to say about the Republican candidate for the presidency:

"I have known Justice Hughes intimately since we were students together at Brown and have seen him a thousand times at work and at play. No man of our generation has a finer combination of character and intellect. Absolutely fearless, unselfish, loyal to American ideals, he is worthy of a nation's trust.

"All his friends know that behind the dignity of bearing is a rich fund of humor and good fellowship. Whether he is climbing a mountain, reading novels, playing with his children, resisting a political lobby or delivering the opinion of the supreme court, he is ever the same rugged, democratic, fair minded American. His varied experience has given him wide horizon and sympathy with every aspect of American life.

"He possesses two qualities rarely found together—the judicial temper and the capacity for swift and resolute action. Under his administration the fog which now besets many public questions would be cleared away.

"His penetrating mind goes to the heart of any subject he selects and strips off the irrelevant at once. Such a mind is peculiarly needed amid the intricate problems that now confront America.

"We need more than good intentions. We need clear vision, sound judgment, strong will, unhesitating decision. In short, we need Charles E. Hughes."

During this critical period the only danger of war has lain in the weak course of the administration.

CANDIDATE CHARLES E. HUGHES is certainly not letting the grass grow under his feet. If elected there will be no grass growing in the machinery of any American industry.

THE war seems to be doing far more for the American merchant marine than could have been accomplished by a ship subsidy. No less than 700 vessels have been added to our fleets since Europe started fighting.

Local and Personal

Tennis Oxfords and Shoes at E. E. Sower's Shoe shop.

E. R. Kennedy was at Visalia this week returning Wednesday.

Now is the time to have H. C. Smith send in your subscription for magazines.

The Rev. and Mrs. Eckles arrived Wednesday and are getting settled in their new home.

N. W. Palmer who has been visiting at Long Beach for several weeks has returned to Campbell.

Found: Case of Drawing Instruments. Owner may have by proving property and paying for this ad.

Mrs. D. O. Hawkins and daughter, Miss Verna, of Fresno, are guests of Mr. and Mrs. W. T. Morton.

Misses Mary Rodeck and Louise Lloyd returned Tuesday from a ten day's visit with friends at San Francisco.

The annual reception of Campbell Union High School to the Freshmen will be held at the home of Mr. and Mrs. E. I. Price on Dry Creek road Friday evening, Sept. 29.

A. V. McCarty, E. H. Barker and Cortland Watson went to Alder Point last week on a deer hunt. Cortland returned Monday reporting two in the bag and later reports credit the boys with three.

Mr. S. W. Douglass, Co. Y. M. C. A. Sec. will occupy the pulpit of the Congregational church next Sunday morning and tell the people of his work and plans for this county. There will be no preaching service in the evening.

Mrs. M. MacDougal and daughter, Mrs. Bunting, of Elizabeth, N. J., are guests of Mrs. H. W. Higbie of Johnson avenue. The ladies have been making a tour of the West and are greatly pleased with the Santa Clara Valley.

Thaddeus Joy, who has lived for some years in the bay cities, has gone to New York where he has accepted a position. Mrs. Joy and the children will join him this fall. So far Mr. Joy is very much pleased with his new location.

Mr. G. L. Withey of Los Gatos has succeeded Mr. C. Sims as Manager of the Dutard Ranch on Santa Clara road and assumed his duties this week. Mr. Withey has been superintendent of the Azule ranch for some time and thoroughly understands the conduct of such a business.

Miss Helen Cowles left Tuesday for Pomona to continue her College studies. Raymond left Friday for the same school. These two young people with their sister, Ruth, will be greatly missed in church circles of Campbell as they have been most industrious and faithful workers.

Mrs. Barney Smith left Sunday afternoon for her home at Rapid City, South Dakota, after passing the summer here with her parents, Mr. and Mrs. Isaac Zion. Mrs. Smith has made many acquaintances and friends during her stay here and is very much pleased with this beautiful valley.

The death of Samuel W. Shaver occurred Sunday at the ranch home on Rincon Avenue, after a protracted illness. Mr. Shaver was born in Canada and had passed his 78th birthday. He is survived by his wife, Mrs. Elizabeth Shaver; a son, F. A. Shaver, who resided with his parents, and a daughter, Mrs. Gertrude Owsley of San Francisco. The funeral services were held Tuesday from San Jose parlors.

Miss Leah Reyburn and adopted daughter, Miss Rose Wallace will leave in a few days for Kansas, where they will make their home for some time. Enroute they will visit Miss Reyburn's other daughter, Verna Leach, who is now living with a sister at Sacramento. Miss Reyburn advertised her home on Rincon avenue for sale, but changed her mind about "burning her bridges," as she feels sure she will want to return later.

Alumni Meet

At a business meeting of the C. U. H. S. Alumni held recently Roy G. Archibald was elected president; Stanley Smith, vice-president and Miss Marion Duncan, secretary-treasurer.

Class secretaries were chosen as follows: L. D. Bohnett, 1901; Charlotte Davis, '02, Alice Joy, '03; Geo. Schuyler, '04; Mrs. Schuyler, '05; Florence Kennedy, '06; Stanley Smith, '07; Mrs. Carter, '08; Frank Nelson, '09; Mrs. E. R. Kennedy, '10; Beth Kennedy, '11; Gilbert Newcomb, '12; Alice Duncan, '13; Edna BearSsley, '14; Katherine Cooper, '15; Frank Mendel, '16.

After business an impromptu production of "Pyramus and Thisbe" was given with the following participants:- Carl Scholz, Pyramus; Valeria DeRemer, Thisbe; Erwin Righter, Lion; Geo. Schuyler, Moon; Easton Carter, Wall; Alice Duncan, Night; Frank Mendel, Curtain, and Mrs. Mildred Carter, prologuer.

Lost Right Hand

The friends of Mr. and Mrs. Lee Hutchins, formerly of Campbell, extend their sympathies to Mr. Hutchins in the sad accident which befell him Saturday. He was feeding a large ensilage cutter on the Brunteson ranch near Turlock of which he is foreman, when his right arm was caught in the shredding blades.

J. L. Hagelin was notified, and accompanied by Robert Scholz, a brother-in-law of the injured man, went to Turlock, and took the sufferer to Lane Hospital, San Francisco, where it was found necessary to amputate the hand and forearm about four inches below the elbow.

New Red Cross Seals

Three hundred million Red Cross Christmas Seals are being printed in Cincinnati for the annual holiday campaign to be conducted under the joint auspices of the American Red Cross and The National Association for the Study and Prevention of Tuberculosis.

The campaign for the sale of Red Cross Seals this year will be larger than ever before. Although in 1915 the sale reached the record total of 80,000,000 seals, bringing in $800,000, it is expected that this year at least 100,000,000 seals or $1,000,000 worth will be sold. The sale will be organized from Alaska to the Canal Zone and from Hawaii to Porto Rico. Every state and territory in the United States will have seals on sale. New organizations will be working in a number of the western states, including Montana, Utah and Wyoming. Distribution of the seals is now under way.

Athletics Defeat San Juan

Last Sunday was a big day in San Juan. A large number of the State's Celebrities were there, including the "Athletics"— These folk had gathered there from all parts of the country for a rehearsal of "Aida" in and about the old Mission. Elaborate preparations are under way for the open air production of this great play at Ewing Field in San Francisco Saturday, September 30. The old "plaza" hotel, together with other buildings surrounding the Mission, have been purchased by an Eastern company and, with additional improvements to the extent of $50,000, will be made one of the real show places of California.

In the midst of all these doings, our Athletics, gay of heart, tripping the light fantastic to the charming strains of "Aida" proceeded to enlighten the boys of San Juan Bautista in the art of the great American pastime. After a period of about two hours the story was completed on a near basis of the old free silver platform—18 to 1. San Juan had pitching for them none other than the Honorable Richard (Dick) Bayless, formerly of Vernon Coast League Club. San Juan needed, more than anything else, a back stop. They used three catchers but none of them seemed to understand Bayless. Our boys made many brilliant plays, and hit well, as the box score will show. Efforts are being made to stage a championship game between Campbell & the Winningers for Sunday. The Winninger Club is the winner of the City League pennant.

Methodist Church Notes

The pastor has returned from Conference and will conduct the services morning and evening, and will also have charge of the Epworth League meeting at 6:30.

The Rev. Fred Sheldon and wife were visitors at the parsonage Wednesday and Thursday on their way from Conference. Mr. Sheldon has been pastor in Ferndale, Humboldt county, but takes charge this fall of Fruitvale church, Oakland. He conducted the prayer-meeting Wednesday evening for the pastor.

Our Leaguers have arranged to take a truck-load of young people to the Biederwolf meeting in San Jose this (Friday) evening. Those desiring to go should be at the church at seven o'clock. Round-trip, twenty-five cents.

See our new assortment of fountain pens. Smith's.

Fountain Pens, Waterman and Conklin at SMITH'S.

Report reached here that fire had broken out in the Gazos canyon and was threatening the Campbell Redwood Lumber Co's. tract. J. F. Duncan, Geo Whitney and Will Cutting went over Thursday morning to render assistance in the fight. Miss Alice Duncan accompanied them.
